

## Microdermabrasion treatment procedure

A simple, straight forward, non-invasive technique using **Crystals, Organic Grains, Oxygen and LED Light**. By exfoliating the top layers of the skin using the World's first Technology Quad Port Machine, set with thousands of tiny crystals that gently resurface the skin. Organic Grains are used to buff and polish the face and neck area. The facial then involves a moisturising Age Defiance cream and Heavenly Eye Regenerating Complex containing Oxygen. Pure Oxygen is then misted over the face finished with LED light therapy to stimulate cell renewal and aid the healing process.

Treatment suitable for both Men & Women

### Optional Extra if required

For an extra £10.00 why not try one of our specially formulated booster face masks, selected individually to suit your skin. (Please request at time of booking to enable us to allow additional time for treatment.)

**Microdermabrasion is the leading non-surgical facial procedure in the US, with more than 1 million patients.**

## Microdermabrasion: A New Option

It's easy to make  
Microdermabrasion treatments  
part of your lifestyle,  
regardless of age.

### Treatments are individualised to your needs

- Little or no discomfort
- 
- No downtime
- 
- Results are immediate
- 
- Affordable
- 
- Skin appears rejuvenated
- 
- Lunchtime' Peel

Stimulate  
your skin

Rejuvenate  
your  
complexion

Organic Microdermabrasion

## How Microdermabrasion works

Microdermabrasion is derived from an age-old treatment called Dermabrasion.

Microdermabrasion is world leading and less abrasive. This modern technology allows for an even dispersion of crystals while providing more comfort to the client. The old surface of the skin is removed, while the vacuum suction stimulates the lower layers of the skin thus increasing collagen and elastin leaving your skin smooth, fresh and rejuvenated.

Microdermabrasion treats the following conditions:

- Ageing & sun-damaged skin**
- Acne & types of acne scarring**
- Altered pigmentation**
- Stretch marks**
- Fine lines**
- Enlarged & clogged pores**

## Smoother firmer skin surface

Microdermabrasion treatments erase epidermal layers at varying depths in a safe and controlled manner. This approach respects the integrity of the skin and promotes even healing.

### Renew

On average our skin is renewed approximately every 28 days. With age and environmental factors cell renewal slows down. Regular Microdermabrasion treatments will amplify the cell renewal process, revealing a healthy balanced skin surface.

### World leading technology

Microdermabrasion is the most requested procedure today for skin rejuvenation. It compliments most treatment programmes without compromising the integrity of the skin. Providing a safe, gentle and most importantly effective exfoliation for your skin.

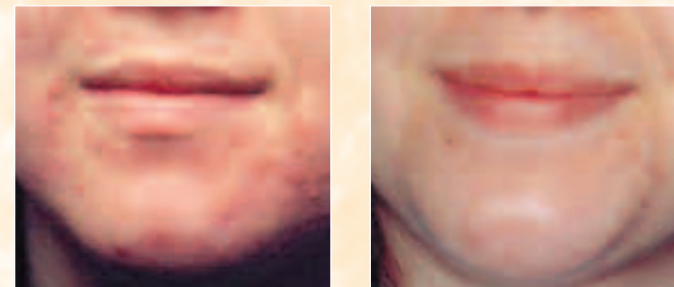

### Fast and pain free

It leaves little to no redness. Aids in minimising the most challenging skin conditions. Rejuvenates your skin to an optimal healthy state.
